(b) FIRM-FILL® 2010

Has compressive strengths from 1950-2750 psi (ASTM C472).

(c) FIRM-FILL® 3310

Has compressive strengths from 2000-3300 psi (ASTM C472).

3. Hacker Floor Primer

A rewettable latex primer that is diluted: 1 part Hacker Floor Primer to 4 parts water.

Note

Some installation methods and components are not referenced. Please consult all approved resources to ensure a complete assembly.

When installing carpet over FIRM-FILL® Brand Gypsum Concretes:

General Recommendations:

Hacker Floor Underlayments can be used with many different carpets, carpet pads and adhesives. Follow the recommended guidelines on page 1 of Hacker Industries' "Guidelines for Installing Finished Floor Coverings" to prepare the underlayment.

For glue-down and double-glue down attachment of carpet and pad, follow the recommended guidelines on page 1 to prepare the underlayment. Follow manufacturers recommendations for adhesives. Prior to installation, the flooring installer shall conduct a sample test to confirm bond compatibility.

Glue-Down Attachment of Tackless Strips over Wood Subfloors:

Prior to installation, the flooring installer should conduct a sample test to confirm bond ability. The following adhesives have been compatible with Hacker Floor Underlayments:

- Roberts 0167 Carpet Gripper Cement
- Hydroment 900, manufactured by Bostik
- Polyseamseal® All-Purpose Adhesive Caulk, manufactured by Darworth Co.

For free-lying carpet modules, Hacker Industries, Inc. strongly recommends that all Hacker Floor Underlayments be sealed prior to installation. Install the carpet modules with 100% adhesive coverage. Follow the recommendations of the carpet modules manufacturer.

For further questions refer to to Hacker Industries' "Guidelines for Installing Finished Floor Coverings."
